

- "Menu" Menu - is unclear and awkward to say
- Huge wasted space that could be displaying useful info
- Jumbo buttons are also major space hogs
- The X button minimizes instead of closing. Same with 'close' from the menu. To quit, you have to go to 'quit' on the system tray menu!
 - In windows, the system won't shut down unless the manger is quit manually.

Islands Manager v1.1.0

View Logs

Launch Island

Shutdown Island

Restart Island

Islands Torrent Manager

Downloading: N files

Seeding: N files

DL: 0.0

UL: 0.0

Mannage Torrents

Window Menu: Show/Hide, Close
(Show/Hide minimizes to system tray, Close does what “Quit” currently does)
(Close dialog box: Close Islands Manager? Active Islands will continue to run in the background.)

Tools Menu: Torrent Manager, Islands Image Authoring

Keys Menu: Trusted Keys, My Keys

Config Menu: Open Configuration, Update Islands VM, View Logs

Help: User Manual, Version Info
(Version info = the info screen currently under ‘menu’)
